1:125 scale fully RTR replica of a K class Shell tanker is now available. The models are manufactured by hand, using 3D techniques, RIM - reaction injection moulding (RTM - resin transfer molding) ,PE (photo-etching of copper) to make a true copy of the ship. The assembly is done in a specialized workshop by well qualified model makers. This model will be equipped with a single screw - servo controlled rudder - 6 volt motor with electronic speed controller and remote control. Furthermore, an acrylic cover with wooden base for display, a booklet and nameplate includes the package. This model has a limited edition of 15 pcs - Customers may choose their favourite ship name and corresponding home port and flag. Price € 1801,00 excl. VAT
